

BUAD 4900 Interview Prep Resource Guide

Application Development Track

Spring 2026

How to use this guide. Resources below are grouped by the four phases of the semester plan, so the reading and viewing lines up with what is being practiced at that point in the course. Each entry is tagged as a video or an article and includes a short note on what to pay attention to. Items marked *stretch* are optional, more advanced material for when you want to go further, not required viewing. Links were current as of August 2026; if a link breaks, search the exact title and source listed and it will almost always turn up the same video or article elsewhere.

1 Phase 1: Onboarding and Foundations (Weeks 1-3)

Weeks 1 and 2 are orientation and the career competencies discussion, with no assigned viewing or reading. The resources below are assigned in Week 3, alongside the resume and LinkedIn discussion, to get grounded in what a modern hiring process looks like and to build a baseline resume and LinkedIn profile.

VIDEO Software Engineering Job Interview – Full Mock Interview

Source: YouTube

A complete run through of a technical interview loop. Watch this first as a level set for what the semester is building toward, not to master any single question.

ARTICLE Software Engineer Interviews: Crafting the Perfect Self Introduction

Source: Tech Interview Handbook

A practical guide to answering "tell me about yourself." Useful for drafting both the interview opener and the summary section of a resume or LinkedIn profile.

ARTICLE Setting Up Your LinkedIn Profile for Your First Developer Job

Source: Medium (Bryan Yi)

A concrete checklist for a first LinkedIn profile, including what to feature and how to describe early projects with limited work history.

2 Phase 2: Behavioral Interview Round (Weeks 4-8)

Practice interviews in this phase happen in Week 5 and Week 7. The resources below build the STAR method and a personal story bank to draw from in both sessions.

VIDEO Behavioral Mock Interview (Jobs and Internships)

Source: YouTube

A sample interview covering the most common behavioral questions in one sitting. A good first watch before the Week 5 session.

VIDEO Behavioral Interviews for Software Engineers: Explained

Source: Exponent

Breaks down what interviewers are actually listening for in an answer, beyond just the story itself.

Good to rewatch before the Week 7 session.

VIDEO Senior FAANG Engineer Behavioral Mock Interview, with Analysis (stretch)

Source: Exponent

Shows a more experienced candidate's answers with commentary. Useful once the basics feel comfortable, as an example of a polished STAR answer.

ARTICLE Behavioral Interviews for Software Engineers: How to Prepare

Source: Tech Interview Handbook

Explains the STAR(R) method with a worked example and a framework for building three to five reusable stories.

ARTICLE Software Developer Behavioral Interview Questions and STAR

Source: starmethod.org

A bank of developer specific behavioral questions to practice out loud before each session.

3 Phase 3: Technical Interview Round (Weeks 9-13)

Practice interviews in this phase happen in Week 11 and Week 13, built around live coding and troubleshooting scenarios tied to actual lab work. The resources below are pitched at a junior or entry level rather than a senior engineer level.

VIDEO Junior Dev Mock Interview on CoderPad

Source: CoderPad

A junior level JavaScript coding interview, close to the level this round is aiming for. Good first watch before Week 11.

VIDEO Mock Technical Interview with Two Junior Developers

Source: RealToughCandy

Two junior developers work through live coding questions together. Useful for seeing how peers at the same stage handle getting stuck.

VIDEO Live Mock Technical Interview: React and JavaScript

Source: YouTube

A full front end technical round. Especially relevant if your lab work leans toward web development.

VIDEO Coding Jesus (getcracked.io) channel (stretch)

Source: YouTube

Detailed mock interview breakdowns, mostly focused on lower level and systems programming. A note on tone: this creator's on camera style is blunt and can read as harsh toward candidates, so save this one for once you have some confidence built, not as your starting point.

VIDEO ByteByteGo channel (stretch)

Source: YouTube

System design concepts explained visually. Optional, and most relevant if your lab work touches architecture or backend design questions.

4 Phase 4: Combined Interview and Wrap Up (Weeks 15-16)

The final practice session blends behavioral and technical questions in a single sitting, the way a real interview loop typically works.

VIDEO [Software Engineering Job Interview – Full Mock Interview \(rewatch\)](#)

Source: YouTube

The same video assigned in Phase 1. Watching it again after both rounds of practice is intentional: notice how much more is visible now, in pacing, question types, and what the interviewer is probing for, compared to the first watch in Week 3.

VIDEO [Senior Software Engineer Mock Technical Interview, Coding and Algorithms in JavaScript \(stretch\)](#)

Source: YouTube

A longer, more advanced coding interview. Optional viewing if you want to see what the next level up looks like.

5 Looking Ahead: Other CIS Tracks

This semester's lab work centers on application development, so the lists above are built around that track. If you are on a different CIS track, the resources below are a starting point for two other common paths.

VIDEO [Top 50 Cybersecurity Interview Questions and Answers](#)

Source: YouTube (Josh Madakor)

A fast run through of common security analyst and SOC analyst interview questions, useful as a technical round reference if you are on a cybersecurity track.

ARTICLE [How to Prepare for a Cybersecurity Job Interview](#)

Source: cybersecurityguide.org

Covers both behavioral and case based questions specific to security roles, including sample answers.

VIDEO [IT Helpdesk Interview Questions and Answers](#)

Source: YouTube

Entry level interview questions and answers aimed at IT support and helpdesk roles, useful if you are on that track with little prior interview experience.
