

Lab W03: A Recursive Multi-Level Cache Simulator

CIS 4020 / CS 2100, Data Structures, Grade Sheet

Student name:

Date graded:

Submission and setup

Project submitted as a reasonable attempt	/ 1
Project compiles and runs without errors, from the command line or an IDE	/ 1
Project named labw03 and source file named correctly for the language used	/ 1
Project committed to the repository for this assignment	/ 1

Code quality

Consistent naming conventions used throughout	/ 1
Consistent formatting and indentation throughout	/ 1
General comment block at the top of the file, per syllabus 4.10.8	/ 1
TODO comment removed from the finished code	/ 1
No unrequested extra code or output	/ 1

accessLevel, the recursive function

Base case (level == numLevels) correctly served by main memory	/ 2
Hit case correctly served by the current level	/ 2
Miss case recurses to level + 1 and combines the result with this level's hit time	/ 2
Block is cached on the way back up only when the level has room (no eviction)	/ 2
Implemented as true recursion, not a loop-based chain of checks	/ 2
Correct output for sample_input.txt (two cache levels)	/ 2
Correct output for sample_input_2.txt (one cache level)	/ 2
Correct output for sample_input_3.txt (three cache levels)	/ 2

Total	/ 25
