

Hack The Box Certified Junior Cybersecurity Associate (CJCA)

Student Resource Guide

About This Guide

This guide collects resources for the Hack The Box Certified Junior Cybersecurity Associate (CJCA) portion of the course. The CJCA is a hands-on, hybrid certification, so this list leans toward practice platforms, self-assessment tools, and community support alongside the required HTB Academy path. Each entry includes a one-line description and a link.

1 Exam Snapshot

CJCA is a 100 percent practical exam completed over a 5-day window, combining machine compromise with blue-team log and alert analysis. A candidate must complete 100 percent of the Junior Cybersecurity Analyst job-role path and hold a valid exam voucher before starting the exam. The table below summarizes the domains covered.

Table 1: CJCA skill domains and focus areas

Domain	Focus Area
IT and networking fundamentals	Linux, Windows, and core networking concepts
Network traffic analysis	Packet capture and analysis with Wireshark and tcpdump
Security monitoring and SIEM	Elastic Stack, KQL queries, and SOC fundamentals
Offensive security basics	Enumeration and basic exploitation with tools such as Nmap and Metasploit
Incident handling and threat hunting	The NIST SP 800-61 process and threat hunting with Elastic
Professional reporting	Documenting findings in a professional security report

2 Official HTB Resources

- **HTB CJCA Certification Exam Page** – The official exam page, with prerequisites, voucher requirements, and registration.
- **Junior Cybersecurity Analyst Job-Role Path** – The required 20-module learning path that must be completed before the exam can be started.
- **Junior Cybersecurity Analyst Path Preview** – A public preview of the path outline and

module descriptions, viewable without an HTB Academy login.

- **HTB Academy Course Catalog** – Browse individual modules, including the free introductory sections of the path.

3 Hands-On Practice Beyond the Path

- **TryHackMe Pre Security Path** – A free, beginner-friendly path covering networking, Linux, and Windows basics that pairs well with the early HTB modules.
- **HTB Starting Point** – A guided track of very easy, beginner-friendly machines on the main HTB Labs platform, useful for building offensive-side confidence alongside the path.

4 Practice Tests and Self-Assessment

- **OpenExamPrep Free HTB CJCA Practice Test** – Free, no-signup practice questions covering all six exam domains, with explanations.
- **SecurityPracticeTest CJCA Practice Test** – Domain-by-domain practice sets that mirror the path's approximate section weighting.

5 Study Guides and Domain Breakdowns

- **SecurityPracticeTest: CJCA Domains Explained** – Explains the skill behind each domain and how to structure practice sessions.
- **Chicken0248's CJCA Exam Review and Guide (Medium)** – A first-hand account of the exam experience and preparation approach from an early exam-taker.

6 Community and Support

- **Official HTB Discord Server** – The central hub for module help, exam-prep discussion, and career channels.
- **HTB Academy Help Center** – Official documentation on navigating Academy, using the Resources menu, and requesting exercise tutoring through Discord.
- **r/hackthebox on Reddit** – Community discussion of modules, certifications, and study strategies.
