

Lab W02: A Recursive Multi-Level Cache Simulator

CIS 4020 / CS 2100, Data Structures, Grade Sheet

Student name:

Date graded:

Submission and setup

- | | | |
|--|----------------------|-----|
| Project submitted as a reasonable attempt | <input type="text"/> | / 1 |
| Project compiles and runs without errors, from the command line or an IDE | <input type="text"/> | / 1 |
| Project named labw02 and source file named correctly for the language used | <input type="text"/> | / 1 |
| Project committed to the repository for this assignment | <input type="text"/> | / 1 |

Code quality

- | | | |
|---|----------------------|-----|
| Consistent naming conventions used throughout | <input type="text"/> | / 1 |
| Consistent formatting and indentation throughout | <input type="text"/> | / 1 |
| General comment block at the top of the file, per syllabus 4.10.8 | <input type="text"/> | / 1 |
| TODO comment removed from the finished code | <input type="text"/> | / 1 |
| No unrequested extra code or output | <input type="text"/> | / 1 |

accessLevel, the recursive function

- | | | |
|--|----------------------|-----|
| Base case (level == numLevels) correctly served by main memory | <input type="text"/> | / 2 |
| Hit case correctly served by the current level | <input type="text"/> | / 2 |
| Miss case recurses to level + 1 and combines the result with this level's hit time | <input type="text"/> | / 2 |
| Block is cached on the way back up only when the level has room (no eviction) | <input type="text"/> | / 2 |
| Implemented as true recursion, not a loop-based chain of checks | <input type="text"/> | / 2 |
| Correct output for sample_input.txt (two cache levels) | <input type="text"/> | / 2 |
| Correct output for sample_input_2.txt (one cache level) | <input type="text"/> | / 2 |
| Correct output for sample_input_3.txt (three cache levels) | <input type="text"/> | / 2 |
